Terminal Disclaimer

1. The terminal disclaimer filed on 03/30/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Pat. 6,753,887 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-12 are allowed.

3. The following is an examiner's statement of reasons for allowance: a cable access network that is communicable over a cable modem by a user computer, that enables dynamic allocation of first and second addresses that relate to service providers the user has subscribed to, whereupon changing between two service provider networks is possible by the method limitations disclosed by applicant.

4. The new search performed for the RCE yielded relevant art, however none that would deem the current application rejectable under the statutes of the patent law. Dobes et al. and Handler et al. teaches cable modem ability to access to multiple service providers (Fig. 12, element S1204) and dynamically allocating address to cable modem (Fig. 12, element S1206), however does not indicate the ability for the user to switch from one network to another, much less the method limitations disclosed by the applicant needed to switch networks and change the network address on the cable modem. Demirtjis et al. teaches user selecting the ISP during login (Col.8, lines 14-34) but does not disclose the ability switch networks upon request.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
